

bodyfurn[®]

An ergonomic student chair that encourages movement for learning.

furnware[®]

bodyfurn®

This unique chair is the result of many years of research, design and testing. Bodyfurn® is all about comfort - and comfort means greater student concentration and improved learning outcomes.

We measured 20,000 students and studied their behaviour in class. This research led to a world first - a dynamic classroom chair that offers the right support without restricting circulation, keeping students comfortable.

The Bodyfurn® chair allows positive movement for effective circulation. With its independently pivoting seat and back, the chair moves as the students move, supporting in all the right places, without any of the traditional barriers of classroom chairs.

features.

- Environmental Choice NZ and AFRDI Blue Tick certified
- strong and durable polypropylene seat and back
- strong, high tensile steel frame
- stackable
- options:
 - size 5 chair has the option of a medium or large seat
 - for extra comfort add a black padded seat (available on large seats only)
